

WINTER STORAGE NOTICE

Narrows Marina, LLC (NM) receives all boats into Winter Storage in the as-is condition. We do not wash, dry, or clean any vessel upon acceptance. We have listed several precautionaries below for Boat Owner's and Operator's to be aware of prior to storing boats in the Winter Storage Building.

Moisture/ Water

We advise that boats be thoroughly dried prior to being brought into storage, as any condensation, moisture, or water could potentially cause mold or upholstery stain issues. Tarps or canvas covers placed over wet boats are more at risk to develop mold issues.

Chemical/ Lotion

Please note boats exposed to certain lotions or chemicals such as: sunblock, tanning lotions, or other miscellaneous products can cause the upholstery to develop orange, yellow, or brown spots once the chemicals oxidize.

Winterization

NM recommends that all boats be fully winterized prior to being stored. Boats not winterized could potentially suffer complete motor loss or other severe damage.

Acknowledgement

By signing below I agree that I have fully read the above warnings, and understand that NM will not take any responsibility for the above mentioned items. It is my responsibility to wash, dry, or fully clean my vessel upon delivery to NM. NM recommends that damp rid buckets or other moisture absorbing tools be used inside vessel's. I also, understand that even if certain precautions are made there is still a chance that damage can occur to my vessel.
